Education

Korea Advanced Institute of Science and Technology (KAIST) **Daejeon, Republic of Korea**

- M.S. in Electrical Engineering Aug 2023 – Feb 2025
- Master's Thesis: Pretraining a Shared Q-Network for Data-Efficient Offline Reinforcement Learning
- Advisor: Prof. Donghwan Lee
- GPA: 3.75/4.3
- **Distinction:** Graduated One Semester Early

Kookmin University (KMU) **Seoul, Republic of Korea**

- B.S. in Mechanical Engineering, Minor in Electrical Engineering Mar 2018 – Feb 2023
- GPA: 4.46/4.5
- **Distinction:** Ranked 1st in the Department; Graduated One Semester Early
- Leave of absence for mandatory military service, Republic of Korea Jul 2019 – Feb 2021

Publications

*Equal contribution

Conference & Journal Papers

- **Scalable Reinforcement Learning via Adaptive Batch Scaling**
  Jongchan Park (sole author)
  ICML, 2026
- **Pretraining a Shared Q-Network for Data-Efficient Offline Reinforcement Learning**
  Jongchan Park*, Mingyu Park*, Donghwan Lee
  NeurIPS, 2025 (Based on my M.S. thesis)
- **Power Consumption Optimization of GPU Server with Offline Reinforcement Learning**
  Heechan Chung, Yeeun Im, **Jongchan Park**, Taeho Lee, TaeYoung Kim, Hyungjun Kim, Donghwan Lee
  IEEE Access, 2025

ArXiv

- **Lifted Bellman Linear Programming for Offline Reinforcement Learning**
  Hyukjun Yang, **Jongchan Park***, Narim Jeong*, Donghwan Lee
  Under review at *ICLR*, 2027
- **An Augmented Lagrangian Approach to Lifted Bellman Linear Programming**
  Jongchan Park, Hyukjun Yang*, Narim Jeong*, Donghwan Lee
- **Policy-Agnostic Critics for Vision-Language-Action Models**
  Jongchan Park

Experience

NAVER LABS **Pangyo, Republic of Korea**

- **AI Robotics Engineer** / Robot Data Platform Team Aug 2026 – Present
- **Projects:**
  - Designing the Cross-Embodiment Data Schema and Pipelines for a Robot Data Flywheel
  - Improving Vision Annotation and Augmenting OOD Data with a Generative Model
  - Pretraining VLAs on about 10,000 hours of Open-Source Robot Data and Post-Training on SO-101 Arms
  - Training a Humanoid Motion Tracker via RL on Mocap Data to Mimic Motion from a Webcam
  - Investigating Efficient Collection, Curation, and Model Improvement in a Data Flywheel

Hyundai Motor Company **Pangyo, Republic of Korea**

- **Research Engineer** / Vehicle Control Technology Development Team 2 Jan 2025 – Aug 2026
- **Projects:**
  - Developed a Real-Time Target Velocity Generator via Flow-Matching Policies 2026
  - Constructed a World Model for Vehicle Chassis Domains from CAN Sensor Signals 2026
  - Optimized EV Front/Rear Torque Distribution via Offline RL (4.5% Energy Efficiency Gain) 2026
  - Developed a Driving Controller for SDV (Software-Defined Vehicle) Prototype Platforms 2025 – 2026
  - Automated Vehicle Calibration with RL Frameworks (2 KR and 2 US Patents Pending) 2025 – 2026
  - Developed an XCP-based CAN Interface for RL Training & Evaluation on Vehicles 2025
- **Industry-Academic Collaborative Projects:**
  - Automated Vehicle Calibration via Inverse RL (with KAIST) 2025 – 2026

Reinforced Decision Intelligence Lab, KAIST **Daejeon, Republic of Korea**

- **Master's Student Researcher** Aug 2023 – Jan 2025
- **Industry-Academic Collaborative Projects:**
  - Wheel Slip Control of a Mobile Robot (Jackal) via Online RL (with Hyundai Motor Company) 2024
  - Power Consumption Optimization of GPU Servers via Offline RL (with KT) 2024
- **In-Class Projects:**
  - Developed a Quadruped Robot Simulator based on Robot Dynamics 2024
  - Trained a Quadruped Sumo Robot via Online RL 2023

Honors & Awards

- **ICML Gold Reviewer Award** 2026
- **Hyundai Icon Award** 2025
  Periodic company award recognizing employees for outstanding research and engineering performance
- **Hyundai Motor Company Research Scholarship** 2024
- **Valedictorian (Highest Academic Honors)** 2023
  Ranked **1st** among approximately 70 students in the Department of Mechanical Engineering
- **Academic Excellence Scholarship** 2021 – 2022
- **Academic Excellence Scholarship** 2018 – 2019

Services

International Conference Reviewer

- ICML Main Conference Reviewer 2026

Teaching Assistant

- Mathematical Foundations of Reinforcement Learning (EE619), KAIST Fall, 2024

Leadership

- Lab Representative, KAIST Spring, 2024
  - Represented a 10-member research group, coordinating departmental administrative matters, faculty communications, and lab operations.

Community Service

- Volunteer Football Coach, Saturday Class for People with Disabilities 2026 – Present
